Feeling lucky? You will with this house plan, especially with the cool pocket office on the first floor. And the largest family room in the collection. And the sick amount of counter space. You'll feel lucky in the large primary suite, which has not one, but two envy-inducing walk-in closets. The second floor includes two additional bedrooms, and, as seems to be the theme with this plan, the largest laundry and bonus rooms of the collection. Lucky indeed.
